How to Use Your Gate Key (Access Card)!

As a reminder, use your Gate Key to scan "in and out" of the gate. We've communicated the importance of using your Gate Key to scan in and out of the gate, even if the gate is open. The gate is often programmed to open and close for certain club activities. If you're coming through the gate at the exact time the gate is programmed to close it could close on your vehicle and severely damage the gate mechanism. Scanning your card (Must beep to acknowledge the scanner read your card) will give an additional 30 seconds of open time, even if the gate is set to close. The gate system does have safety devices to prevent closure on a person or vehicle, but nothing is 100% effective, and for the little time it takes to scan your card it's worth preventing thousands of dollars in damage. Also, don't allow vehicles behind you to "piggyback" through the gate. If a vehicle is behind you, they're obligated to scan their card also. If a guest is accompanying you in another vehicle, scan them in first then scan yourself through the gate. Again, this applies whether the gate is opened or closed!

Many folks feel this is just too much to do and ignore the procedure. But understand that the gate is extremely important for the security of the club, not to mention the cost of the system, so using it the way it was meant to be used is of major importance. If the procedure continues to be ignored we will have to turn on the option to make it mandatory to scan in before you can scan out if the gate is closed. In other words, if you didn't scan in because the gate was open and when you leave the gate is closed, you'll have to walk to the entrance scanner to scan your card, then scan your card again at the exit scanner to open the gate.

If you encounter any issues with the operation of the system, let us know by emailing:
